Inspection: 3.00

Advice: 0.00

Travelling: REDACTED

Findings

1. **Compliant** [CATEGORY] Special species records of applications for bioproducts inspected as part of my PPL HBA. Good system and improved request form. Adequate governance in place for the necessary due diligence on bioproduct use in particular to justify use of dog blood.

Handling Instructions: Contains personal sensitive information, subject to confidentiality requirements under the Data Protection Act. This should only be circulated in accordance with ASPA Guidance and stored in a locked secure location. All government information may be subject to an FOI request and subsequent assessment.

2. **Compliant** [CATEGORY] Governance & Communications

Dogs. Small donor pool of 5m and 6f for use and reuse to supply bioproducts. This is the minimum colony size that is able to produce the necessary group samples for regulatory requests.

Kept in social groups with suitable enrichment and good care and interaction from staff. Dogs trained and habituated to blood sampling.

3. **Compliant** [CATEGORY] Procedures and Breeding

Use and reuse (dogs and ferrets) clarified while assessing bioproducts PPL.

Rehoming is on the PPL and dogs and ferrets will be considered but only occasional successes in the past due to difficulties suitably re habilitating dogs as pets once they have been in the donor pool for some time.

4. **Compliant** [CATEGORY] Procedures and Breeding

Update on management of ferret breeding. Some success in using vasectomised males to induce false pregnancies and manage total litters born in the cycling females. Delvosterone was tried but jills did not come bac into season relaiably hence the move to trying vasectomised males (now 4 on site)

Males)including vasectomised) have to be singly housed due to aggression in pairs/groups but good enrichment, sight and smell of other ferrets an good handling by the trained staff
